

US Army Corps  
of Engineers

CLIENT: **US Army Corps of Engineers (USACE)**

QUALIFICATION: **Border Fence Program**

### Project Management

Collaborated with Government-based agencies to coordinate, plan, and design, projects to build the border fence. Developed Project Management Plans (PMPs) Conducted timely project updates, supported all data input, edited, stored, and conducted validation and verification of scheduling statistics to ensure accurate maintenance and revisions as required. Applied Project Management Institute's (PMI®) project lifecycle principles to all facets of scheduling and management. Ensured project close-out was completed and accomplished on schedule.

### Scheduling

Created schedules for managing the construction of the border fence. Schedules included Government Furnished Material (GFM), ordering and pickup, site preparation, detailed construction, and necessary reviews and inspections. Coordinated physical pickup and return of GFM and close out processes.

### Logistics

Developed systems to manage the complete supply chain to support border fence construction for GFM. Tracked orders from contractors through vendors, and from delivery, construction, and waste/recycle. Adapted quickly to be able to manage a large variety of material and supplies needed to support operations.

### Data Analysis

Created metrics and analysis tools to monitor project status and effectiveness. Earned value and associated Key Performance Indicators were calculated and monitored throughout the project. Ensured GFM data was entered into databases by contractors was accurate and assisted to correct the data if needed.

### Sharepoint Development & Maintenance

Established a SharePoint portal to organize all program and project documentation to include documents, status, reports, updates, and drawings. Managed, processed, and maintained all types of documents to ensure details were updated and version controlled within the system. Used "alert" function to notify portal users of document changes and additions. This portal increased communication between team members and stakeholders, allowing near real-time information and updated project status.

## Agile Group

A Small Business Administration (SBA) certified 8(a), Woman Owned Small Business (WOSB), Agile Group is a niche firm supporting government and commercial clients throughout the world to better manage, measure, and communicate their project portfolios.

Agile Group brings over nine years of Federal Government experience with knowledge management, program creation & execution, PMO development, project management and controls, portal development and sustainment, quality control, and training. We deliver these solutions and related services for numerous Federal agencies including the U.S. Army, U.S. Army Corps of Engineers (USACE), the U.S. Department of Homeland Security (DHS), and U.S. Customs and Border Protection (CBP).

## Best Value

- ▶ Retaining a deep experience working with U.S. Federal Government, including Customs and Border Protection and USACE
- ▶ Executing USACE Primavera and scheduling contracts for an array of services across geographically-dispersed offices
- ▶ Maintaining highly complex software tools to meet the diverse needs of a wide-breadth of functionally-diverse Federal business units
